

# Team C4 Integration

Made in Canada solutions for DND's

LCSS project.

## Introducing Team C4 Integration

Risk free SME solution providers for the LCSS project

“Taking SME solutions to the next level”

Some of Canada's top SMEs have teamed together to deliver to DND/PWGSC a risk free contract for the manufacture, test and delivery of the LCSS project.

Some of Canada's top SME's have teamed together to deliver to DND/PWGSC a risk free contract for the manufacture, test and delivery of the LCSS project.

Cleeve has done this before, are a proven entity and have the scars to prove it!

Team C4 Integration provides a manufacturing & Supply Solution, dedicated to providing the Canadian Military with a quality, cost effective, on time product and service in support of the LCSS Project. We give DND/PWGSC one contact point, but with all the benefits resulting from a strong team of premier Canadian manufacturing companies.

Team C4 Integration is comprised of complementary Canadian blue chip SME manufacturing & assembly companies whose combined products, services and technical expertise are dedicated to providing a "one stop shop" manufacturing and project support to DND/PWGSC on the LCSS project.

Team C4 Integration is headed up by Cleeve Technology with Mil-Aero, QSDM and Dellcom rounding out the in house manufacturing capability.

## OUR COMPANIES

Our strength derives from a highly focused engineering approach to solving electrical interconnect problems which we compliment with a highly skilled and qualified manufacturing capability.

Assigned with NSCM cage codes, ISO, AS9100, SC21, Controlled goods and many other accreditations and approvals.

Cleeve Technology is a high-tech Canadian company that has developed a substantial reputation for providing innovative solutions to the electrical interconnect sector of the military, aerospace and marine industries, both domestically and internationally. Cleeve has delivered large contracts very similar to the LCSS project many times in the past.

Mil-Aero Electronics is an Atlantic Canadian company renowned for the manufacture and integration of high-performance cables, wire harnesses, electro-mechanical assemblies, electronic enclosures and boxes for the defence, aerospace and Industrial markets.

QSDM is a highly innovative, customer-driven company that designs, manufactures, and delivers cost effective, high quality electronic products and solutions such as the full population and test of complex printed circuit boards and flex-prints, electronic assemblies and enclosures. Over 27 years of full electronics manufacturing services (EMS).

Dellcom has over 30 years experience in metal fabrication of custom machined and turned parts including enclosures and boxes for the defence, aerospace and Industrial markets. With 16 CNC mills, 9 CNC lathes and a full compliment of CNC milling and turning equipment they meet and exceed customer expectations.

## OUR PARTNERSHIP

To supply DND/PWGSC with the quality products and services they have come to expect from us as individual companies, in addition to recognizing DND/PWGSC's desire to have a "made in Canada" turn-key solution in support of the LCSS project, we have formed this partnership.

The combination of our core strengths and the strong supplier partnerships we have developed over the years enables us to offer DND/PWGSC:

- Design and development of product from the sub-assembly to the system level.
- Standard and custom design for manufacture solutions.
- Prototype manufacture and qualification (environmental and operational testing).
- Production manufacture, sub-assembly, final assembly, system integration and test.
- On-site installation and follow-up support.
- Flexibility (high-mix, low volume and low-mix, high volume handled easily).
- Exceptional customer service and rapid response to our customers' changing needs.
- Strict quality and process control governed by the AS9100 quality management system.
- Our team is ideally suited to offer a "Made in Canada" cost-effective complete solution.
